

Equipment stamping center

hapema machine pool:

6 stamping presses **Bruderer 25to, Bruderer 30to, Bruderer 50to, Bruderer 80to**

We realize Stamping parts from 0.05 mm - 2 mm thickness at a maximum tool length of 1.45 m

To monitor our part quality:

1 camera test Cell
2 camera test Cells
1 camera test Cell

Hayeg Prozesscontrol (Surface inspection front/backside)
Hayeg Prozesscontrol (100% Geometrie)
Vester Videocheck (100% Geometrie)

Additional testing and monitoring units:

1 Scope
1 digital Profilprojector
1 roughness measuring instrument
1 force test center
1 force-deflection analyzer
1 Tape welding machine

Werth Scope Check 3D CNC
Keyence (for single parts)
Mahr Perthometer M1
Zwick Z0,5 TN
Alluris
Leicht Stanzautomation

During production, we monitor and manage your product quality with our CAQ System of IQS
